

## SEATTLE RECORDING STUDIO FOR SALE

For sale: most of the equipment, the rights to the brand name, the domain name and website for a charming established Seattle recording studio. This facility and

business has been internationally advertised for seventeen years and includes a client list, domain name and website. The building is owned by a local landlord willing to negotiate a new lease. The facility is a small converted

schoolhouse and features a great warm acoustic sound resulting from the wood floor and sound treatment featuring dispersion rather than absorption. A commercial recording studio with thousands of projects completed,

the facility can provide a wide variety of services. It is so well-soundproofed that neighbors for years did not realize until told that it was a recording studio. It has a yard, flowers and lawn and is convenient to downtown, public transportation, swimming, arts organizations and concert halls. Sold with major acoustic improvements completed such as independent second wall construction, closeable window panels for natural light, and custom AC and wiring harness. TASCAM analog console and 24 track analog tape machine. Older version of ProTools and digital interfaces. Gorgeous 1903 Steinway A grand piano and several choice vintage analog synths including Prophet V. This studio would make a good haunt for a composer/performer or, yo, a crib for a "ProdUsa of BeaTz," fly DJ or musician, including a sleeping loft, kitchen, bathroom and storage. Also has a small office, storage or drum room, and laundry facility. It could also function as a recording business or audio production facility. Contact the owner for a detailed equipment list and to answer any questions. Sale requires cash or secure loan with good credit. Seek to sell by January 1 and vacate between that time and February 1, 2008. The details can be discussed be-

tween the owner and interested parties.
